# Рассмотрим установку на примере среды разработки IntelliJ IDEA

The screenshot shows the official IntelliJ IDEA download page. At the top, there's a navigation bar with links for Developer Tools, Team Tools, Learning Tools, Solutions, Store, and a search bar. Below the navigation is the IntelliJ IDEA logo and a "Download" button. The main content area is titled "Download IntelliJ IDEA". It features two main download options: "Ultimate" and "Community". The "Ultimate" section is for "For web and enterprise development" and includes a "Download" button and a note about a "Free 30-day trial". The "Community" section is for "For JVM and Android development" and includes a "Download" button and a note about being "Free, built on open source". Both sections have dropdown menus for "Windows", "macOS", and "Linux". At the bottom left, there are links for "System requirements", "Installation Instructions", "Other versions", and "Third-party software". At the bottom right, there are links for "IntelliJ IDEA Ultimate" and "IntelliJ IDEA Community Edition". A note at the bottom center states: "IntelliJ IDEA is available for Intel and Apple Silicon".

Выберите наиболее подходящий для вас вариант установки:

- **Ultimate** подходит для тех, кому нужны JavaScript, TypeScript, SQL, CSS, PhpStorm, GoLand, PyCharm Community Edition, Spring, Java EE, React, Angular, Node.js, Vue.js.
- **Community** подходит для тех, кому нужна JDK и среда разработки IntelliJ IDEA.

Скачайте нужную версию самостоятельно.

- Триальная версия Ultimate будет доступна на протяжении 30 дней. Обязательно воспользуйтесь ей: по истечении срока напишите на [hello@skillbox.ru](mailto:hello@skillbox.ru), и мы пришлём промокод для дальнейшего бесплатного использования Ultimate. Версия Community будет доступна для вас всегда.

Важно. Купон для дальнейшего использования версии Ultimate выдается тем пользователям, которые воспользовались триальной версией редакции.

Регистрировать триальную версию *Ultimate* необходимо на почтовый адрес, на который зарегистрирован ваш курс.

Воспользуйтесь нашей вспомогательной [статьёй для установки ПО](#) на свой компьютер.

Если у вас нет аккаунта на [jetbrains.com](#), создавать его отдельно не нужно. А если есть — алгоритм получения лицензии тот же.
